News from Iwate's Reconstruction

Ganbaro, Iwate! Let's stick together, Iwate! Volume 127 July 2017 Edition

The news from Iwate as it moves toward reconstruction

We are deeply grateful for the heartwarming encouragement and support received from both within and outside of Japan in the aftermath of the Great East Japan Earthquake and Tsunami, which struck on March 11, 2011. The precious bonds created during this time will always be cherished.

We will now bring you the news from Iwate's reconstruction.

The First "Iwate Reconstruction for Tomorrow" Seminar of 2017

Morioka

On June 24 2017 (Sat), the first "Iwate Reconstruction for Tomorrow" seminar of 2017 took place in Morioka.

The seminar is organized by the local industrial-academic-governmental group, lwate Tomorrow Design. This is its third year. Around 140 people with an interest in the reconstruction came from within and outside of the prefecture to attend.

In the first half of the event, after the Governor gave a greeting, Professor Jun lio from the National Graduate Institute for Policy Studies gave the keynote speech. After explaining the problems facing modern Japan, he pointed out further problems that have been brought to light by the disaster. He then suggested that the reconstruction in Sanriku could become a pioneering model for solving those issues.

In the second half of the event, there was a discussion theme panel on the "Considering the Reconstruction of the Present and Future, from Multiple Viewpoints". Eriko Totsuka from Pasona Tohoku Sosei spoke about her experience of meeting people from disaster-hit areas, and how she learned about the importance of projects that encourage exchange. Rina Shimomukai, a representative of the charity Nonnori Noda Story, talked about promoting Noda Village's charms via exchange tours and residential study programs.

Emily Hallams, a Coordinator for International Relations in Kamaishi City, spoke about conducting international relations by transmitting information abroad, and its importance for the reconstruction. It was a productive discussion, and the

audience appreciated hearing the panelists speak from positions of personal experience.

Iwate Prefecture is Now Hiring Fixed-Term Employees for the 2017 Year

In order to tackle the increase in reconstruction work taking place after the Great East Japan Earthquake and Tsunami, as well as Typhoon Lionrock in 2016, Iwate Prefecture is hiring fixed-term employees to work for prefectural or municipal organizations.

Period of employment

Three years, from April 1, 2018 to March 31, 2021.

*People hired before April 1, 2018 will have contracts that run for 3 years from their starting date.

Type and number of positions

* Subject to change. Up-to-date information will be provided via the Iwate Personnel Commission's website.

Type of work	# of positions	Main places of employment	Work duties
Clerical work	25	■ Prefectural assignment: Branch offices or the Prefectural Office	Clerical work relating to reconstruction efforts.Approval and authorization. Other general work.
		Municipal assignment:Rikuzentakata, Kamaishi, Iwaizumi, Tanohata	•Reception work, consultations about rebuilding people's lives, taxes, site acquisition, compensation, etc.
Construction work	47	Prefectural assignment: Coastal branch offices or the Prefectural Office	 Planning, surveying, purchasing and supervising (seawalls, ports, fishing harbors, fishing grounds, roads, rivers, etc.).
		 Municipal assignment: Kuji, Rikuzentakata, Kamaishi, Otsuchi, Iwaizumi, Tanohata 	 Planning, surveying, purchasing and supervising (roads, water and sewerage, fishing harbors, rivers, farmland, etc.).
Architecture	1	■ City assignment only Rikuzentakata	• Planning, surveying, purchasing and supervising.

Examination eligibility criteria

Clerical work	Must be born before, or on, April 1, 2000 (Must be 17 or older by April 1, 2017)
Construction work	Must fit one of the following criteria (as of late June 2017): ① 1st or 2nd-class engineer operation & management qualification ② Experience equivalent to a 2nd-class engineer operation & management qualification
Architecture	Must fit one of the following criteria (as of late June 2017): ① 1 st or 2nd-class architect license ② Practical experience equivalent to a 2nd-class architecture qualification

Selection process

Clerical work: Formal test / Essay / Personal interview

Construction / Architecture: Application essay / Resume of experience / Personal interview Inquiries:

More Iwate fixed-term employees

Construction of 895 Public **Homes Completed**

Rikuzentakata

Iwate Prefecture has completed construction of the Wakinosawa public housing for disaster survivors (a 3-story, reinforced concrete building with 60 units) in Yonezaki, Rikuzentakata. New residents have started moving in.

The Great East Japan Earthquake and Tsunami damaged the houses of 8,029 households in Rikuzentakata. The City has been working with the Prefecture to build new public facilities to rehouse these victims. Rikuzentakata City constructed 269 units across 6 complexes, and Iwate Prefecture constructed 626 units across 5 complexes. In total, 895 units have been completed, across 11 housing complexes.

As of July 12, residents have moved into 677 of the new public homes. 451 of these are under city management, and 226 are under prefectural management. This puts the occupancy rate at 76%

People with certain circumstances will be able to extend their occupancy in temporary housing starting from the 2018 fiscal year. Because of this, Rikuzentakata City will be consolidating their temporary housing units based on the results of a housing reconstruction survey from last August, and also inform residents about the extended occupancy period.

The completed Wakinosawa complex, now with residents

High-quality Rental Housing for Survivors -**Government Authorizes New Districts**

7 coastal towns

On July 4 (Tue), the Reconstruction Agency authorized Iwate Prefecture's plan for special regulations for high-quality rental housing for survivors, which created a new reconstruction zone (note: zones have different regulations that encourage development). This is the sixth time a zone has been created after an application by a prefecture.

If rental housing is built that fulfils certain conditions within a reconstruction residential district, it is eligible for either special tax repayments or tax exemptions. There are 18 of these districts within 7 cities, towns, or villages: Miyako, Ofunato, Rikuzentakata, Kamaishi, Otsuchi, Yamada and Noda.

The new measures will increase the construction of private sector rental housing, and provide additional options for empty sites not earmarked for anything else. It will also help people hoping to move to Iwate find accommodation. This is expected to lead to an increase in the residential population in these 7 coastal municipalities.

For more information, please consult Iwate Prefecture's website, or contact the Bureau of Reconstruction's Reconstruction Promotion Division.

The affected regions

Settlement	Reconstruction Residential Districts	
Miyako	Taro, Kuwagasaki & Koganji	
Ofunato	Ofunato Station area	
Rikuzentakata	Takata, Imaizumi	
Kamaishi	Katagishi, Unosumai, Ureishimatsubara, Heita, Tobu	
Otsuchi	Machikata, Akahama, Ando, Kirikiri	
Yamada	Yamada, Orikasa, Osawa	
Noda	Jonai	

A Record of the Great East Japan Earthquake and Tsunami in Iwate Prefecture 2011.3.11

Kuji

What happened that day? In this section, we will be looking back at the disaster in each coastal town.

The destroyed aquarium, Moguranpia (Photo: Kuji City)

The destroyed Japan Oil Storage Facility (Photo: Kuji City)

- Tsunami Height 12.0m Hirono / North Kuji coast
- 13.7m Kuji Bay 14.5m South Kuji coast
- Deaths 2
- Missing people 2
- Injured people 10
- Destroyed buildings 278

1. Kuji suffered extensive damage

The total financial cost of the damage in Kuji came to ¥31,090,150,000. This includes damage to offices and factories in the commercial/industrial sector, as well as industries like fishing, tourism, forestry, construction, and agriculture.

2. Harbor facilities were quickly rebuilt

The sediment washed in by the tsunami was a major obstacle for ship navigation. However, after some exhausting removal work, large ships were able to arrive in port again on March 25th. On March 26th, large government ships carried relief supplies into port.

From April 5th, Kuji was able to accommodate trawlers from Miyako or Kamaishi, and fishing boats from other regions. This was of huge benefit to their reconstruction.

The rebuilt Japan Oil Storage Facility

Hirota Clinic Completed, **Treatment Services Begin**

Rikuzentakata

Rikuzentakata City's National Health Insurance clinic, the Hirota Clinic was the only clinic on the Hirota peninsula. It was destroyed in the Great East Japan Earthquake and Tsunami, and its medical supplies were lost. Services resumed at the untouched Hirota Elementary School the following day, and treatment has been conducted at a temporary facility since August 2011.

Construction of a new facility has now been completed on elevated land behind the school. Treatment services started on June 26 (Mon).

Next to the clinic is Hirota Community Center, which has also been recently completed. This means that the site won't just be a medical facility; it will also be a place for local residents to meet.

Hirota Clinic, now treating patients.

Coastal Development Bureau and the Hokkaido Iburi Development Bureau Sign an Agreement Hokkaido

On June 19 (Mon), Iwate's Coastal Regional Development Bureau signed a collaborative agreement with the Hokkaido Iburi Development Bureau.

The agreement commits to establishing a regular ferry service between Miyako Bay and Muroran Bay in Hokkaido from June next year. The ferry will be a foundation for tourism, exchange and industry, and will strengthen links between the Iwate coast and the Iburi area, giving a boost to both regions.

At the signing ceremony, Mr. Komukai, Director of the Coastal Regional Development Bureau, spoke of his hopes regarding the new agreement. "I want this link between the two regions to lead to further reconstruction and recovery from the Great East Japan Earthquake and Tsunami", he said.

The two regions have many things in common, including geoparks and steel industry. Further plans include the creation of a round-trip tourism route using the ferry, and collaboration between manufacturing companies. Cooperation in many different fields is expected to expand from here on.

Mr. Komukai, Director of the Coastal Regional Development Bureau, and Mr. Honma, Director of the Hokkaido Iburi Development Bureau, sign the agreement.

Come to Sanriku!

Sanriku Event Information

Kamaishi

Sanriku Ofunato

Ofunato

Venue: Morikawa Kasenshiki Park, Kyassen Ofunato Parking Lot, around Ofunato Fish Market

On the 4th, Tanobata boats will parade across the water of the bay. On the 5th is a display of Nikko Toshogu Horseback Archery. The finale is a firework display with 8,000 fireworks, and a performance from the Tanabata fleet.

Ofunato Chamber of Commerce and Industry **5** 0192-26-2141

See the northernmost "Ama" divers in action

Starting on July 1 (Sat), you will be able to see traditional ama divers (female free divers) at the Kosode Coast in Kuji. Watching the ama, the northernmost such divers in Japan, is a Kuji summer tradition. The divers, clad in wave-patterned kimonos and white slippers, free dive 8m underwater to retrieve sea urchin. You can eat the sea urchin right there on the spot, or go next door to the Kosode Ama Center to eat classic summer foods like sea urchin on rice or grilled seafood.

Dates: Weekends and holidays from July to September

* Bookings for groups of 10 or more are accepted on weekdays.

Times: 1 10:20~ 2 11:20~ 3 14:20~ Fee: ¥500 (per person)

0194-54-2261

You can eat the sea urchin on the spot.

Goishi Coast Campsite – no equipment required

Venue:Ohama area of Massaki, Ofunato City

http://goishi.info/camp-site/

The Goishi Coast, in the Sanriku Reconstruction National Park, is a 6km stretch of coast on the south side of the Massaki Peninsula in Ofunato It's home to the Goishi Coast Campsite, which is surrounded by tourist sites.

The campsite has an auto camp site for caravans or motor homes, and a free site where you can set up tents yourself. You don't have to stay overnight, either; you can enjoy daytrip camping too.

You can even enjoy a barbecue - no preparation or equipment needed. Knives, chopping boards, and other equipment are available for rent, and meat or seafood sets can be preordered (¥3,500 for 3-4 people's worth).

There's plenty to see, like Anatoshiiso (a set of three mysterious rock arches), Kaminariiwa (a rock formation that makes a sound like thunder),

and the Goishi-zaki Lighthouse, which has been officially named a "romantic lighthouse". There are walking paths through the nearby pine forest that overlook the coast, and exceptional views from the numerous observation decks scattered along the route.

Fees

Auto Site: ¥4,000 per night / ¥2,000 day trip Free site: ¥1,500 per tent, per night / ¥1,000 day trip * Plus a ¥500 fee per person (free for kids under 5)

Dates: July 7 - October 31

Inquiries: Goishi Coast Information Center **☎** 0192-29-2359(8:30~17:15)

The mysterious rock formation, Anatoshiiso

Many young people are diligently helping the affected area of Sanriku move toward a full reconstruction. The section "People for Sanriku's Future" introduces these young people and their powerful feelings.

Part 72 introduces Ms. Eriko Totsuka's efforts.

Originally from Tokyo. After joining Pasona, she worked on temp worker placement. She volunteered after the disaster, and then used temporary leave to work at the "Kamaishi Hitotsunagi Nature School." After rejoining Pasona, she used an internal program to set up Pasona Tohoku Sosei in Kamaishi.

She currently coordinates study tours and corporate training courses that link Tokyo university students and companies to businesses on the coast, and works on local venture projects.

A link between Kamaishi and Tokyo

Ms. Totsuka works enthusiastically towards building links between Kamaishi and Tokyo, by coordinating study tours and corporate training courses where people can learn from the disaster. "In Tokyo, it's difficult to feel like you're really contributing to the reconstruction. But the sight of people in

Representative Director Pasona Tohoku Sosei

Eriko Totsuka

"I want to promote fulfilling private and working lives from Kamaishi!"

their 20s or 30s coming to Kamaishi, to take the lead in building its future, is really reassuring. There's a lot we can learn from Sanriku's disaster victims. I want to keep planning study tours that build continuous links with the town," she said.

She also spoke about how Kamaishi is evolving. "You probably can't see it if you've only ever lived in Kamaishi, but if you go to-and-from Tokyo, you notice how the city is changing. Of course memories of the disaster are fading, but you never know when the next earthquake would hit a place like Tokyo. I hope to keep the memory of 3.11 alive so we can continue to learn from it," she said.

Kamaishi's potential

Ms. Totsuka told us about her plans for the future, and about Kamaishi's potential. "I want to work towards a society where people are freer to choose how they want to live and work. I think it would be good if Kamaishi became a city that offers plenty of challenges. I want to make this a place where you don't just move in and work - you launch a business of your own, and choose your own way of life and working patterns," she said.

Casualties & Damage in Iwate

As of June 30, 2017

► Human casualties/deaths: (direct) 4,672 Missing: 1,122 (related) 463

▶Buildings destroyed (residences only, total/partial): 26,077 To make a donation to aid in Iwate's reconstruction: www.pref.iwate.jp/fukkounougoki/dayori/news/011100.html

Thank you for all your support!

As of June 30, 2017

Donations for survivors: Around ¥18.56738 billion (94,872 donations) **Donations for reconstruction projects:** Around ¥19.84552 billion (8,235 donations) Iwate Learning Hope Fund donations: Around ¥9.02233 billion (20,282 donations)

> 💥 This fund is to assist in the study and daily life of affected children by encouraging sport and study activities.

"Machisapo Iwate" is an app that promotes Iwate's tourism, food and more. In late July, it was combined with "e! Iwate" and rereleased.

You can use it on smartphones running the following operating systems.

- Android OS 4.4 or later
- •iOS 9.0 or later
