Iwate Prefecture

News from Iwate's Reconstruction

 \sim Ganbaro ! Iwate! Let's stick together Iwate \sim

We are deeply grateful for the heard-warming encouragement and support received from both within and outside of Japan in the aftermath of the Great East Japan Earthquake, which struck on 11th March 2011. The precious bonds created during this time will be always cherished. More than a year has passed since the disaster, and most of the rubble and debris have been removed to a temporary site, as recovery efforts continue to move forward as planned. Although, the road to recovery is not easy, lwate's people remain firmly united in their efforts to rebuild and reconstruct Sanriku Area and lwate.

三陸旗興

Now, here is some latest news of lwate

[Praying for the safety of Sanriku Railways and its reconstruction work]

A ceremony was held at the site of Shimanokoshi Station in Tanohata village on June 13th, to pray for the safety of the reconstruction work on the stretch between Omoto Station and Tanohata Station (10.5 km) on North Rias Line.

North Rias Line suffered heavy damage due to tsunami as the tracks were swept away; however, at present, 80% of the line restoration work has been completed, and the service is available between Miyako-Omoto and Tanohata-Kuji stations.

The area near Shimanokoshi station, where the prayer

ceremony was held, suffered one of the worst damages as the station building and a bridge nearby were swept away by tsunami. The new Shimanokoshi station is being built near a tunnel located on the north side of the original station location.

Moreover, a ceremony was also held near Horei Station of Sanriku-cho in Ofunato City, to pray for the safety of the restoration work of the stretch between Sakari \sim Yoshihama Station (21.6 km) on the Sanriku Railway South Rias Station on May 30.

The train service on the line connecting Kamaishi and Sakari stations on South Rias line was suspended as a result of damage caused by the disaster.

The service on the stretch between Sakari \sim Yoshihama is expected to restart by April of 2013. The reconstruction work would involve raising the ground level, bridge repairs, dismantling of the old building and construction of the new Rikuzen Akasaki station.

[Let's protect the health and safety of the people!]

There is a growing interest among people towards the effects of radiation on health, since the radioactive substance spread due to the nuclear plant accident triggered by the Great East Japan Earthquake and Tsunami.

Under these circumstances, Iwate Prefecture has been working to further strengthen its system by creating a team to work on the protective measures against radiation, in addition to its existing organization.

The Director of Iwate's Prefectural Environment and Health Research Centre, Mr. Yoshiaki Takigawa says: "The safety standards for the radioactive substances found in food or water have become stricter. In order to secure food safety and protect people's health, our Center will conduct regular sample surveys using most up-to-date equipment, and announce the results of these surveys as speedily as possible."

Human Casualties/Deaths : 4,671; Missing: 1,218
Buildings Destroyed: (Residences only; Total/Partial): 24,877

[Travelling exhibition of "Kizuna" begins]

A Chinese character or *kanji* is announced every year at the Kiyomizu Temple in Kyoto; this *kanji* symbolizes that particular year, and in 2011, the *kanji* of *Kizuna* meaning 'Bonds' was chosen.

The head priest of Kiyomizu temple, Seihan Mori, who wrote the character of *kizuna* and who is also a Goodwill Ambassador for Iwate, donated the calligraphy work of *kizuna* to Iwate prefecture as a symbol of support to the disaster-hit areas.

This calligraphy work will be displayed in turns at the public hall on the 1st floor of each of the government office buildings in the affected coastal areas, so that people in the disaster-hit areas will have an opportunity to appreciate the calligraphy work.

Exhibition Period	Venue
May 25 \sim June 25	Ofunato Area Office Bldg.
June 28 \sim July 30	Kamaishi Area Office Bldg
August 2 \sim September 3 25	Miyako Area Office Bldg
September 5 \sim October 5	Kuji Area Office Bldg

[Now, you can enjoy a new Online video programme about Iwate!]

Iwate Prefecture has created a new video website in order to disseminate information about Iwate's gradual recovery since the disaster. The video revolves around a pair of Yoshimoto Agency's comedians known as 'UNDER-AGE' who during the course of the programme, meet various people of Iwate; the number of videos to be distributed online per month will be 2, and there will be a total of 13 videos.

The first edition of the series, to be made available on June 4th, will introduce a project called "Rikuzen Takada's Sakura Line 311"; this project aims to plant cherry trees to connect the spots where tsunami reached, as an effort to pass on the memory of the disaster to the future generations.
